

Task Execution

- A Redux store is configured for saving information.
- Using “Axios”, I have gotten list of animal names from json file.
- This list is then saved in Redux store.
- Code is self-explanatory and I tried to keep it as simple as possible.

To run this App

- Install “Redux-DevTools” extension, if you don’t already have it.
For Chrome
<https://chrome.google.com/webstore/detail/reduxdevtools/lmhkpmbekcpmknkioeibfkpmmfibljd?hl=en>
- Go to
<https://github.com/ahsan846/React-front-end-task>
hit “Clone or download” and download the repository and extract it
- Open command prompt and change directory to folder where you have extracted the source code.
- Now type **npm install** to install the required packages.
- Type **npm start** to run the app in the development mode.
- Open <http://localhost:3000> to view it in the browser. The page will reload if you make edits. You will also see any lint errors in the console.
